

## LMI Solutions Announces Supply Order Automation with Print Tracker

### Dateline – Phoenix, AZ, USA

LMI Solutions Inc., a manufacturer and distributor of premium replacement toner cartridges, related imaging supplies and services across the USA and Canada is proud to announce automatic supply order integration with Print Tracker.

- Print Tracker supply alerts can now be forwarded to LMI to be automatically processed for drop shipment of supplies. Shipment tracking through LMI's user friendly E-commerce portal and daily reports help make supply ordering accurate, automatic, and timely.

"Print Tracker has been a long-time partner with LMI. We are pleased to integrate more fully with the Print Tracker alerting system to the benefit of all our dealers", stated Aaron Dyck, Vice President of Sales and Marketing at LMI Solutions.

Lance Hale, President of PrintTracker™, commented, "As the industry trends toward supply and service management, we are excited about this new opportunity to strengthen our partnership by offering a higher level of automated services."

### About LMI Solutions

LMI Solutions is a manufacturer and distributor of premium replacement toner cartridges and provides related imaging supplies to dealers, VARs and office supply retailers throughout the United States and Canada. Headquartered in Phoenix Arizona, LMI has 4 North American distribution centers with advanced packaging and shipping capabilities offering one source for over 1,000 print consumables made by both LMI and the most popular OEMs. Recently, the MPSA selected LMI as the global winner of the best "MPS infrastructure provider" based on their go to market expertise, tools and resources scoped at helping MPS providers grow profitable revenue streams in the explosive managed print arena.

### About Print Tracker

PrintTracker™ is an MPS software solutions company. PrintTracker™ Pro is a simple-to-install, intuitive-to-use software solution for the imaging device industry. PrintTracker™ Data Processor automates input of meters and alert information into ERP systems.
