

Print Tracker Announces Free, Fast, and Easy USB Key Setup

Dateline – Boise, Idaho, USA

Print Tracker™ is proud to announce that Print Tracker Pre-sales License holders now have the option to prepare an unlimited number of USB keys for software deployment and quick, on-the-go assessments.

“Nobody likes to pay for a USB key,” said Print Tracker software developer Pete Garman, “especially when most dealers have plenty of USB drives around the shop. Why pay for something you already have?” He continued, “Dealers can load and distribute keys to managers, salespeople, service technicians, IT staff, or just about anybody who might deploy Print Tracker.”

Simple Setup of USB Drives

With just three mouse clicks, administrators can load a USB key with Print Tracker 'Installation' files for fast deployment, 'Run' files for quick, on-the-spot assessments, and a host of security related support documents for field distribution.

Simply insert a blank or nearly-new USB thumb drive into a workstation with a Print Tracker Admin and download the appropriate files. Security documents include:

[Print Tracker – Frequently Asked Questions](#)

[Print Tracker – White Papers](#)

[Print Tracker – HIPAA Compliancy](#)

[Print Tracker – PCI Compliancy](#)

[Print Tracker – Sarbanes-Oxley Compliancy](#)

... and a host of others.
